PROFILE

Business Information Systems student at Assiut University, Faculty of Commerce, with an academic foundation in economics, accounting, and business. I combine an understanding of business and financial operations with developing skills in Data Analytics, Business Intelligence, and Artificial Intelligence. Through practical exposure at Commercial International Bank (CIB) and training in the Digital Egypt Pioneers Initiative (DEPI), I am building the ability to connect business needs with technology-driven, data-informed solutions. Interested in business innovation, digital transformation, and connecting with people shaping the future of business.
